Re: Crocker Wind Farm (EL17-028)

Dear Madam Chairperson and members of the SD Public Utilities Commission Board,

You can find my personal information and viewpoints on file elsewhere as I have been in touch with you via emails, letters and personal testimonies for several months, now! In order not to waste time repeating myself, I will condense my opinions in short form!

I echo my husband, ██████████ viewpoints in that I was very disappointed the SD PUC voted to dismiss the Permit Application of the Crocker Wind Farm Project. Our local county board of commissioners messed up by changing the setback from 1000 feet to ¾ mile in midstream without basis in fact. Geronimo Energy had been working for years already moving the project along.

I have constant faith in Geronimo Energy and their expertise in bringing this project to fruition. We have worked together for several years already and have been kept in the loop regarding the progress. I support the decisions they make and ask the SD PUC to approve and welcome the reconsideration filing requirements that were cause of concern.

Thank you, Kristie Fiegen, Gary Hanson and Chris Nelson, for your time, efforts and consideration in this matter. I appreciate you.

Over 60 landowners are in **favor** of and have **supported** this project, which is a wide majority of people and land involved. It is time for the Clark County Board of Commissioners and the local community to support and work with Geronimo Energy, welcoming them to make this project a reality. Let us move forward for the benefit of Clark County and our great state of South Dakota! **Progress!!**

Respectfully,

Wendy K. Christman
