Subject: Re: [EXT] EL21-011

Hello,

I am emailing today to voice my concerns over Docket EL21-011, proposed by Black Hills Energy, and urge the commission to NOT approve the amendment.

I am worried that this amendment, if approved, would discourage residents and businesses from exploring alternative, and more sustainable, energy options. I believe Black Hills Energy is trying to hold onto a monopoly they have in the region with this proposal. In turn, hurting other South Dakota businesses and impeding our freedom as residents to explore the market and new, more efficient ways to meet our living needs. Please do not stop progress to help this one business.

Thank you for your time,

Anna Robinson
