Good Morning,

I recently had an opportunity to research the proposed "off the grid" proposal in front of the PUC for consideration. I am opposed to there request for any additional fee/increase on these types of setups. We need to encourage more "GREEN" effects and the cost and development of these are already very expensive, but educational to all others who follow. These proposed fees are punitive and prejudicial in effect and will ultimately stifle further implementation. I am not an "off the grid" user but appreciate and encourage their development!

In thanks for your consideration,

Brett Sutton
Rapid City, SD
