Subject: [EXT] BH Energy Tariff

PUC committee considering BH Energy Tariff

Both Marie and I oppose this punitive tariff requested by BH Energy to be levied against concerned citizens who have invested their own funds to create green power for the planet.

We were forced by costs to become energy independent and joined the grid when we could. Our expenses and frustrations are ours, and we trust we are not alone. We oppose the tariff and request our previous statements and experiences be considered by the committee.

Please use these as comments and witnessed statements against BH Energy (and by association BH Corporation) and their plan to charge customers for prudence and caution.

I wonder if all homes with back-up generators are being considered for this tariff as well.
