RE: In the Matter of the Application by North Bend Wind Project, LLC for a Permit to Construct and Operate the North Bend Wind Project in Hyde County and Hughes County, South Dakota – PUC Docket: EL21-018
MAGT File: 7900

Dear Ms. Van Gerpen:

I write today regarding the Aircraft Detection Lighting System (“ADLS”) for the North Bend Wind Project. This letter concludes the Project’s commitment to provide progress updates in the docket until such time as sensor control of the turbine lights is established.

ADLS sensor control is fully operational on all of the Project’s lights. Three of the Project’s turbine lights require resolution of component issues unrelated to the ADLS system, which are being addressed under warranty by the light manufacturer.

At this time, the Project is pleased to confirm this will be its final update in the docket concerning its efforts to resolve issues with the Project’s ADLS system. The firmware update previously deployed to all turbine lights has now demonstrated full ADLS sensor control, and the ADLS system continues to operate reliably and communicate successfully.

Please file this letter into the docket pursuant to Condition 35. As always, thank you for your courtesies in this matter.

Very truly yours,

MAY, ADAM, GERDES & THOMPSON LLP
