6. SWITCHED ACCESS SERVICE

6.2 PROVISION AND DESCRIPTION OF SWITCHED ACCESS SERVICE

6.2.3 FEATURE GROUP C (FGC)

A. Description (Cont'd)

9. The Company will provide 0+ and 0- intraLATA access from pay telephones utilizing Smart Public Access Lines via FGC for calls dialed as 0+ or 0- and/or 101XXXX 1+ in the following manner. 1+ interLATA sent-paid access from pay telephones utilizing Basic Public Access Lines Service shall be provided by FGD.

(C)

(C)

a. Smart Public Access Line (PAL)

For traffic originating from a Smart PAL, the customer to whom such calls are routed shall order FGC trunks from end offices to the customer's premises via direct trunks or via Operator Access Tandems, with the Operator Trunk-Full Feature type of transport termination, as set forth in 6.3.2, following. The trunks must be dedicated, and the customer shall specify the number of trunks required at each end office from which the customer will receive 0+ or 0- traffic.

(C)

The customer is responsible for providing all other operator services signaling capabilities, as described in the Operator Services Systems Generic Requirements (OSSGR) Technical Reference FR-271 and the LATA Switching Systems Generic Requirements (LSSGR) Technical Reference FR-64.

When the Company provides Operator Services Signaling (OSS) between an Operator Access Tandem and the customer's premises, the customer will be required to order a separate and final trunk group from the Operator Access Tandem to the customer's premises for each Numbering Plan Area (NPA) within a LATA to identify the originating NPA. Also, the customer must order a separate trunk group for each type of coin control signaling that is utilized among the equal access end offices subtending an Operator Access Tandem.

The Company will not block 101XXXX 0+ or 0- calls and will route 101XXXX traffic in accordance to the end user request. It will be the responsibility of the 101XXXX 1+ dialed carrier to complete the casual 101XXXX intraLATA call or to provide a recorded message to the end user.
