Subject: Justification for Allocation of 5,000 Contiguous Numbers for Rapid City Market Expansion

To: Midco

From: [REDACTED]

Date: 24 November 2025

Dear Midco,

[REDACTED] is expanding its operations into the Rapid City market to support our growing [REDACTED]. This expansion requires a robust and scalable communications infrastructure to ensure seamless connectivity across all new facilities and services.

To accommodate this growth, we are requesting a block of **5,000 contiguous numbers**. This allocation is critical for the following reasons:

1. **Market Size and Growth Projections**

Rapid City represents a significant strategic market for [REDACTED]. Based on [REDACTED], staffing requirements, and anticipated service lines, we expect substantial demand for direct-dial numbers across multiple departments and locations.

2. **Operational Efficiency**

A contiguous block of numbers will allow us to implement a consistent and logical numbering plan, simplifying internal routing, call management, and future expansions. This approach minimizes administrative overhead and reduces complexity for both staff and patients.

3. **Future-Proofing**

Allocating 5,000 numbers ensures we have sufficient capacity for long-term growth, [REDACTED]. This proactive measure prevents fragmentation and the operational challenges associated with multiple smaller allocations.

4. **Regulatory and Compliance Considerations**

Maintaining a contiguous numbering scheme supports compliance with industry standards [REDACTED] and reliable communication.

We appreciate your consideration of this request and are committed to working closely with your team to ensure a smooth implementation. Please let us know if additional details or projections are required to support this justification.

Sincerely,

[REDACTED]
